

Preventive medications at no cost to you

Preventive care can help keep you healthy and may even save your life. Getting routine health exams and screenings can help catch problems early, when they're easier to treat. And getting the right preventive care services can help you manage your health conditions and stay healthy.

Under the Affordable Care Act (ACA), pharmacy benefit plans must cover certain categories of preventive care drugs and products at 100%.* That means you don't have to pay a share of the cost — no copay, deductible or percentage of the cost (coinsurance).

How do I get these drugs at no cost?

Talk with your doctor about choosing the medication or product that's right for you. To get these preventive drugs, including over-the-counter (OTC) drugs or products:

- They must be right for your age and condition.
- You'll need to get a prescription from your doctor (even for OTC products).
- Use your Anthem member ID card to fill the prescription at a pharmacy in your plan.

Remember, only you and your doctor can decide on the medications you need and what's best for your health.

If you have questions, call us at the Member Services number on your member ID card.

Preventive drugs and products, by category

Here's a list of medications Anthem plans will cover with no cost-share for you under the ACA. Keep in mind that this list can change. Brand-name drugs are listed with a first capital letter. Non-brand drugs (generics) are in lowercase letters.
