

National Drug List

Medication alternatives

And Its Affiliate HealthKeepers, Inc.

The National Drug List is a list of prescription medications approved by the U.S. Food and Drug Administration (FDA). We've reviewed these drugs through our Pharmacy and Therapeutics (P&T) Process, which considers a drug's:

- Effectiveness
- Safety
- Similarity to other drugs within a therapeutic class
- Affordability

The National Drug List is an open drug list or formulary, with some closed drug classes. The list includes a broad range of drug choices – including 99% of all prescription medications.* If a medication is not on the list, there are other high-quality, cost-effective choices, called preferred alternatives, that are.

Medications not included on the National Drug List are shown on the chart included here, along with their preferred alternatives that are on the list. Your coverage has limitations and exclusions. For details about what's covered and what's not, it's best to check your *Certificate/Evidence of Coverage* or *Summary Plan Description*.

To view and search the complete National Drug List, visit anthem.com/pharmacyinformation. Information on dosage/strength options and any restrictions such as quantity limits, prior authorization or step therapy requirements is available. Members can also call Member Services at the number on their member ID card.

What if a medication isn't on the National Drug List?

There may be times when a member's drug isn't on the National Drug List and the doctor thinks that another option isn't right for the member. The doctor can submit a request for an exception. This process, called prior authorization, requires the doctor to call the Member Services number on the member's ID card or go to anthem.com/pharmacyinformation to download and submit the prior authorization form.
