LEGEND

PA = Prior Authorization. Some drugs need to be reviewed and approved before they're covered by your plan. This process is called prior authorization. It looks at drugs that may have harmful side effects, the potential for incorrect use or abuse, options that work better and cost less, and/or guidelines for use with certain conditions.

QL = Quantity Limits. Taking too much medicine or using it too often is dangerous and costly. That's why this program may limit how much of your medicine you can get each month. For example, a drug may have a limit of 30 pills for 30 days.

ST = Step Therapy. Step therapy means you try medicines in a step-by-step process. The program may require you to start with one medicine before another can be approved.

DO = Dose Optimization. This program may change the dosage of your medicine to make it more effective. For example, you may have to start taking a higher dosage once a day rather than a lower one twice a day.
